

## **What are Veterans Hired In Healthcare Saying about MMAC?**

### ***Here's what Former Navy Corpsmen Have To Say:***

“The MMAC Program has in many ways helped me get adjusted and acclimated to the civilian workforce in record time. “

“This program helps eliminate the fear of such a transition for individuals who join the military straight out of high school. “

“In my new role at Bon Secours Virginia Health System I am a Clinical Care Technician. I work in the capacity of and LPN but I'm not yet an LPN. When I was a Corpsman in the Navy, I was doing the same things as an LPN but now I work with practitioners, nurses and others in my practice. The Military Medics and Corpsman Program has benefited my family and it has benefited me by allowing me to work freely and do as I was trained. It really makes me excited to be in the Military Medics and Corpsmen program and I hope it will go on for years to come for other veterans who really need this program.”

“MMAC gave me the chance to keep practicing medicine at a decent pay while getting my education; making my transition from the military almost seamless. “

“Beverly and Phillip are great ambassadors and made using the program easy. Not mention just friendly, caring and great people. “

“I would like to extend my gratitude to you and all members of the team that have worked on establishing the MMAC program and the opportunity it provides for skilled military veterans in their transition from the military healthcare system to the civilian workforce. This allowed me to continue to maintain and expand my skills.”

“I was able to locate the program information online and spoke with a representative at the MMAC office and received excellent information and instructions for participating in the program. The process was quick and easy, and all resources and instructions provided were clear, concise, and helpful. The ease of access to this program, its staff, and resources are excellent. This is an important program to assist skilled veterans in our transition to civilian service, as well as provides local healthcare systems with skilled staff to better serve the community.”

“Thank you for your time and consideration. This is an excellent program, and I would love to see it become a permanent resource for veterans in Virginia as well as other states. If I can be of any assistance, please feel free to contact me, and I appreciate all of the assistance from this program in my job search.”

### ***Here's what Former Army Combat Medics Have To Say:***

"I am proud to be affiliated with the MMAC Program and I hope that more states could have it so as to support our veterans. The support and encouragement does not stop once you have a job and they keep you in the loop with everything that is going on that would affect you. "

"Thank you for your time and service. The Military Medics and Corpsmen Program is revolution, inspiring, and certainly a most needed resource. I am honored to be a part of this program. Once again, thank you for your service."

"Because of the MMAC program, I have been able to gain employment with benefits, stabilize my life and finance to build a better credit history and get a car (my first car ever). Dream bigger for myself and my future. "

"It is so great to know that there are people to assist combat medics such as myself in finding employment at facilities such as Carilion! Thank you for the continued support."

"The MMAC program made me believe in myself so much more and in my capabilities to transition back and make use of all my medical skills and knowledge gained from the service. I really appreciate all that you do and I am grateful and humbled to have come across your services. "

"It has allowed me to get back into the clinical field, helped build my clinical experience, medical terminology, and patient interaction. It helped me in my pursuit of applying to physician assistant school. "

"I actually had an interview with Sentara in Harrisonburg, VA today! I was offered a job on the spot. This job is an incredibly large blessing to me. Thank you SO much for all that you have done! I also learned some valuable information from your organization. Again, this organization has blessed me immensely. Thank you so much!"

### ***Here's What Former Air Force Medical Technicians Have To Say:***

"This program is so dedicated to its Veteran that it is unbelievable sometimes. It has given me everything I need in life to succeed. Without my job I have now, I would of never known about their nursing program that I will be attending here shortly. Also, I would not have the extra income needed to support myself nor my family. It was an opening of one door that led me to a hallway of hundreds of doors. "

"All I have to say is Beverly Vantull is amazing. She worked with me from day and was always on standby when you needed information. She's so amazing, I was able to get a job in less than a month. "

“You helped me connect to a job opportunity while I was still in the military on terminal leave. I don’t know how you can make this experience any better, especially after helping me get a job offer to start work three days after I retired. The program worked for me. Keep doing what you are doing!”
