Say it all . . .

The second you walk through the doors, you can tell you are in a one-of-a-kind place.
—Annette, Reston, Virginia

It’s definitely not the stereotypical Nursing home. It is bright, open and airy with large rooms and many activities for the residents and their families.
—Vicki, Troutville, VA

We take great comfort in knowing Dad is receiving excellent care in a nurturing facility.
—Louise, Bethesda, MD

As difficult as it was to decide to have my husband cared for, it was the best decision. The caring personnel gave professional attention to my husband. This made it possible for me to leave him knowing he would be well looked after.
—Muriel, Roanoke, VA

I am deeply grateful for the stability and peace VVCC provides not only to my father but also to me and the family.
—Wendy, Alexandria, VA

From the start the dedicated staff has given dad the excellent care we know he deserves. Two years later we are still amazed that such a place exists.

RESTRAINT POLICY

It is the philosophy of Virginia Veterans Care Center to promote a restraint free environment. When use of a restraint is medically necessary, the least restrictive alternative available will be used. All residents have the right to be free from physical and chemical restraints. It is our position that restraints may interfere with the quality of life for our Veterans.

The use of physical restraints can contribute to a decline in overall health status to include, but not limited to:

- Pressure Sores
- Confusion and Agitation
- Pneumonia
- Urinary Tract Infections
- Dehydration
- Skin Tears
- Falls
- Decline of Physical Mobility
- Loss of Dignity

A restraint free environment promotes Quality of Life for our Veterans!
VVCC has adopted a liberalized diet philosophy that supports the quality of life and nutritional status of residents in long term care. We use "qualified dietetics professional to assess, monitor, and evaluate the need for medical nutritional therapy based on each individual's needs and rights" as recommended by the American Dietetics Association. Concerns are addressed promptly with the primary care physician.

For nursing home, residents receive meal trays individually prepared based on VVCC Standing Orders for conversion of outside orders to standard house diets.

For assisted living, the same menu selections are served cafeteria style in a central dining room. Residents receive education as needed to support healthy menu choices, but ultimately each resident selects menu items without interference from staff. Residents also choose snacks from those available from dietary and those they purchase independently. Our menu selections include items appropriate for residents who should limit sodium, cholesterol, and calories. This encourages residents to actively participate in healthy living.
